Our Story

Our passion lies in bending tubes. For more than half a century we've been bending tubes for schools, institutions, restaurants and hotels, concept stores, architects and interior designers.

We are bending tubes in order to make great furniture. Furniture that stands the test of time. We make our chairs, stools, tables and desks in Belgium, and we dispatch them everywhere in the world.

We love to be challenged and we love to collaborate, as such we would love to help you with some made-to-measure solutions.
